

Archers Court, Hitchin

client	MHA
location	Hitchin
size	4944m ²
value	£6.1m
status	Complete

project overview

To maximise the development potential of this site, 24 purpose-built Care Apartments were constructed following the completion of Elmside Care Home. The development is built on the site of the existing Care Home and was phased to allow the residents to remain in situ during the rebuilding process.

The Apartments have been arranged on three levels with lift and wheelchair access throughout. Registration standards have been generally exceeded throughout the development's fully equipped 1 & 2-bedroom Apartments.

The design of the new Home and Apartments echoes the style of the original building and its materials, yet each new block retains its own separate identity.

Archers Court offers a reassuring combination of independent living together with a dedicated care team available to residents around the clock.

The aim is to develop a real community within the Care Centre; Archers Court shares Elmside Care Home's facilities.

The demand for the Apartments enabled most of the flats to be sold "off plan" even in difficult market conditions.
